CALF CROP 1957

CURRENT SERIAL RECORD

NOV 26 1957

February 20, 1958

CALF CROP 2 PERCENT SMALLER

The United States calf crop in 1957 totaled 41,007,000 head, a decline of 2 percent from the 42,010,000 head in 1956, according to the Crop Reporting Board. This was the third consecutive year to show a decrease in the calf crop and the crop was 4 percent below the record 1954 crop of 42,601,000 head. However, the 1957 calf crop was 10 percent larger than the 1946-55 average. All regions showed a decline from 1956 except the South Atlantic.

The decrease in the calf crop during the past year resulted from a decline in cows and heifers 2 years old and over. The number of all cows and heifers 2 years old and over on January 1, 1957 was 47,670,000 head, 2 percent less than a year earlier. Cow herds were further reduced during 1957.

The number of calves born in 1957 expressed as a percentage of cows and heifers 2 years old and older on January 1, 1957 was 86 percent--the same as 1956 and 1 percentage point above the average of 85. This percentage is not strictly a calving rate since the January 1 inventory of cows and heifers 2 years old and older does not include all the heifers which would give birth to calves during the year, and since the inventory does include some cows that are sold before calving. The percentage is calculated to show the trend in productivity over a period of time. It may fluctuate from year to year due to variations in cow slaughter during the year and trends in breeding herd replacements.

NORTH CENTRAL STATES

The calf crop of 17,207,000 head in the North Central States was 2 percent smaller than in 1956 but 7 percent larger than the average. In this area, the East North Central States report a 1 percent decline, while the West North Central States showed a 3 percent decline. The calf crop expressed as a percent of cows and heifers 2 years old and over was 91 percent, compared with 90 percent in 1956.

SOUTHERN STATES

In the South Central States, the calf crop was 10,520,000 head in 1957, 4 percent below the previous year, while in the South Atlantic States the calf crop totaled 3,382,000 head, 3 percent above 1956. The calf crop expressed as a percent of cows and heifers 2 years old and over was 82 percent in the South Central States compared with 84 percent in 1956, and 79 percent in the South Atlantic States, 1 point above a year earlier.

WESTERN STATES

The Western States' calf crop of 6,897,000 head in 1957 compared with 7,044,000 in 1956. The calf crop was 86 percent of the number of cows and heifers 2 years old and older on farms and ranches on January 1, 1957 compared with 85 percent in 1956.

NORTH ATLANTIC STATES

The calf crop in the North Atlantic States totaled 3,001,000 head compared with 3,078,000 last year. The calf crop as a percentage of cows and heifers 2 years and older was 84 percent compared with 85 percent in 1956.

Not strictly a calving rate. Figure represents calves born expressed as percentage of the January 1 inventory of cows and heifers 2 years old and over on January 1 and not the number of all cows and heifers giving birth to calves during the year.
